Product highlights

Super Flat Black Line FX
Philips TV picture tube with invar mask gives less deformation and therefore can provide 80% more contrast than conventional picture tubes for brilliant colours and minimal reflections, even when viewing in daylight. This real flat tube is from the latest generation of tubes where the tube face is truly flat. The advantages of this lies in appearance, wider angle, and in bringing the picture nearer to the front of the glass for less distortion.

Contrast Plus
A special circuitry has been incorporated into this receiver to enhance the darker portions of the picture for added realism and overall picture quality.

Incredible® Surround
Incredible Surround widens the sound stage, giving you the impression of having extra speakers all around you.

Plug & Play
Having connected the tv, it automatically searches for all channels and installs them.

10 Pages Smart Text
Fast access to your own programmed favourite text pages.

Twin Page Teletext
You can watch 2 pages of the Teletext page consecutively, display on 2 halves of the screen.

Top Controls
Volume and channel change controls on top of the tv to enable easy adjustment without the remote control.

Side Connections
Digital cameras and video games can be connected quickly and easily to video or stereo AV inputs. Connect your headphones (optional) for convenient private listening.
